

NuFirewall

Open-source authenticating firewall

Who's that guy?

- Eric Leblond
 - 1993
 - CTO EdenWall Technologies
 - NuFW project leader
 - Netfilter developper
 - Ulogd2 maintener
- Regit
 - http://home.regit.org/
 - @Regiteric on twitter
- French
 - activate your babelfish to deal with my accent

Discovering NuFirewall

- NuFirewall at a glance
- Fontionnalities
- NuFW at an another glance
- Architecture
- Demonstration
- Planned evolution

What is NuFirewall?

- A ready-to-use Linux firewall gateway
 - Standard Netfilter firewall
 - Authentication via NuFW
 - Fully manageable throught a graphical GUI
- A free distribution
 - Based on debian Lenny
 - Configuration via a QT-based GUI
- A free version of EdenWall appliance
 - Software
 - Free

Fonctionnalities

- System and network configuration
- Firewalling
 - Netfilter configuration
 - NuFW setup and configuration
- Directory handling
 - LDAP (posix)
 - Active Directory
- Logs analysis
- Ipsec VPN

NuFW

- Brind identity to the network
 - Filtering rules with group match
 - Ability to do QoS and differenciated routing (via marks)
- « exclusive » algorithm
 - authentication on multi-users computer
 - Resist to basic attack (IP and arp spoofing)
- Développed by EdenWall Technologies
- Available under GPLv3 licence

Software architecture (1/2)

- Heavy client configuration
 - Python-QT GUI
 - Communication with firewall via XML-RPC over HTTPS
- Server Architecture
 - Server developped in python twisted
 - Core
 - Common functions
 - Transport
 - Components
 - Responsible of a function (network, filtering)
 - Dependance handling, ...

Software architecture (2/2)

Components of the solution

- NuFirewall
- NuFirewall Administration Suite (NFAS)
 - Same version as EAS
 - But different icons (Nupik inside)
- Authentication Agents
 - Nutcpc : Console client for Linux and Unix
 - Nuapplet : Graphical Client written in QT
 - NuAgent : Windows Agent (freely available but proprietary)
 - EdenWall Agent : extended version of NuAgent
- Documentation

System configuration

System configuration

- Network
 - Ethernet Interface
 - Vlan
 - Bonding
 - Routed network
- Authentication
 - Kerberos, kerberos/AD, password, radius, certificat
- Groups
 - LDAP, AD

NuPKI, PKI made simple

Firewall rules management

Firewall rules management

- Drag&Drop based interface
- Ipv4 and Ipv6 filtering
 - Netfilter
 - NuFW
- SNAT and DNAT
- Fonctionnalities
 - Coherence tests
 - Display filtering
 - Wizards

Logs analysis

Logs analysis

- Firewall log analysis
 - Netfilter (via ulogd2 pgsql and mysql output)
 - NuFW
- Graphical display
 - Bar
 - Pie
 - Table
- Dashboard
- Basic report

Conclusion

- NuFirewall
 - Is a free authenticating firewall
 - Simple and friendly user interface
- Planned evolution
 - 1.0 this summer
 - Some components will be separately available :
 - Nuface : rules management
 - Nulog: log analysis
 - NuPKI: PKI
 - Update to follow EdenWall Appliance

NuFirewall will not evolved without them

- Pierre Chifflier (aka pollux, aka Mr Pare-feu Openoffice)
- Victor Stinner (aka Haypo)
- Feth Arezki, Pierre-Louis Bonicoli, Laurent Defert, Nicolas Frisoni, Kamel Messaoudi, Francois Toussenel
- Olivier Carrere, Julien Miotte
- Harmony Igolen

NuFW

Algorithmes

Principe de fonctionnement

Phase 1: Identification des utilisateurs et groupes associés

- Ouverture d'un tunnel chiffré de signalisation vers le firewall par l'agent de l'utilisateur
- Vérification des informations d'identité par le module d'authentification auprès d'un référent d'organisation (LDAP, Radius)
- et 4 Récupération des groupes utilisateurs auprès d'un référent d'organisation (annuaire LDAP)
- Association entre l'identité de l'utilisateur et ses groupes par le module d'authentification

Principe de fonctionnement

Phase 2: Identification du premier paquet de connexion

- Interception du premier paquet de connexion par le module de filtrage
- 2 à 6 Analyse par le module décisionnel
 - Validation de l'identité de la source
 - Validation de l'accès à l'application cible

Differences between EdenWall/NuFirewall

- EdenWall is an hardware solution
- High availability
- Centralised Administration (multi firewall)
- Multi-user adminitration (profil, external authentication)
- UTM fonctionnalities
- Professional support
